

Creative Serving is proud to announce two new products for 2010

Dog House: Keeps a stocked inventory of cooked dogs or other grill items and will help **lower electricity costs!** When the roller grill sells out, simply open the drawer and reload with ready to eat product.

- Low profile design allows it to be stacked with a roller grill
- Heats and holds 60-80 grill items at safe serving temperatures
- **Holds product at serving temperature for up to 6 hours**
- Two sections allow for holding different products simultaneously
- Removable pans and lids for easy cleaning
- Dimensions: 30.50" W x 23.50" D x 5.00" H
- Can be stacked with ANY size roller grill in the industry!

Infinity Heated Merchandisers: Hold hot product fresh at peak serving temperature for twice as long as comparable units. Our TG Heating System allows the Infinity series to utilize a Stainless Steel serving area while achieving similar heat distribution to aluminum.

- **Digital heat controls for each shelf**
- Industry first mirrored back enhances product display and retains heat
- Custom backlit canopy for enhanced merchandising and brand awareness
- Removable, aerated trays allow better airflow for **extended product life**
- Safety coated shatter-resistant lights enhance product displays while safe guarding food products from bulb breakage

Creative Serving has been in business since 1997, manufacturing roller grills and an assortment of other food service equipment. Our product line has been engineered to **maximize energy efficiency** which will **significantly reduce customer's energy costs**. Our equipment has been designed so it may be "stacked" with other units, allowing customers to **maximize counter space** by growing **vertically**.
