

Finally a High Volume Solution for Limited Counter Space

Creative Serving's line of **Infinity Heated Merchandisers** are a convenient way to create impulse sales by placing fresh product right in front of the customers. Infinity Merchandisers hold hot products at peak serving temperatures for hours and are perfect for convenience stores, supermarkets, delis, concession stands, snack bars, kiosks, and pizzerias.

Our latest model, **INF1803** has an 18" base and three shelves **each** with separate digital heat controls to allow for a large variety of products to be served simultaneously.

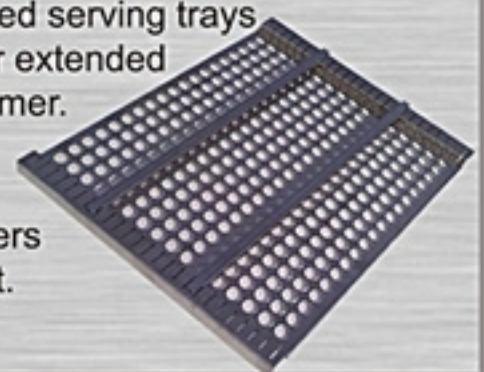

- A custom backlit canopy for enhanced merchandising and brand awareness
- Industry first mirrored back enhances product display
- Digitally controlled top and bottom heat ensure product is served at optimal temperatures
- Engineered to maximize energy efficiency thus reducing store's energy costs
- Our unique TG Heating System allows the Infinity to utilize a stainless steel serving area while achieving similar heat distribution to aluminum
- Visit our website for other Infinity models and options

The removable, aerated serving trays allow better airflow for extended product life in the warmer.

Removable tray dividers separate food product.
